**Forensic & Compliance Systems Names Condyn Master Reseller for  
Sub-Saharan Africa; Multimillion Dollar Agreement Highlights Increasing Global  
Demand for Intelligent Email Archiving Compliance Systems**

*Leading IT Security-focused Reseller Gains Exclusive Rights to Sell, Distribute and  
Market the Cryoserver Email Archiving and Compliance Appliance in Sub-Saharan  
Africa*

**EAST NORTHPORT, NY – February 19, 2008** – In a sign that email compliance is a global concern for companies of all sizes, South African security distributor Condyn ([www.Condyn.net](http://www.Condyn.net)) has been named a Master Reseller for the Cryoserver email archiving appliance by Forensic & Compliance Systems ([www.Cryoserver.com](http://www.Cryoserver.com)) in a multimillion dollar deal giving the distributor exclusive rights to sell, distribute and market Cryoserver in this important region. The designation will enable Condyn to broaden and strengthen its IT security products and services for current customers and to create new opportunities for its Problok Hypershield© security platform.

“Forensic & Compliance Systems is pleased to establish a strategic relationship with Condyn in the Sub-Saharan African region. Condyn is the recognized leader in delivering and supporting the world's best security solutions within the African market and it has a well-established reputation across the Continent,” said Forensic & Compliance Systems CEO Ralph Harvey. “We welcome Condyn to our global partner program as it increases sales and support for our Cryoserver email archive and compliance appliance.”

“The strategic partnership between Forensic & Compliance Systems and Condyn represents an ideal opportunity to provide Cryoserver’s best-in-class email archiving and compliance solution for protecting our customers, said Condyn CEO Jorina van Rensburg. “The Cryoserver technology plays a key role in our Problok Hypershield© Security Architecture, helping to make it the most comprehensive and effective security solution available anywhere from any single source supplier.”

Cryoserver is a forensic email compliance solution that meets the data protection and privacy requirements of a wide range of organizations in industries including legal, finance and education, as well as government agencies. The Cryoserver email compliance archive solution is a tamper-evident, sealed appliance that is easy to implement and manage. Traditional email archiving solutions allow organizations to store data, but their lack of forensic capabilities prevents from being used in a court environment as admissible evidence. Cryoserver is the first email archiving product that successfully addresses this issue as it was built from the ground up to merge email archiving, compliance and forensic capabilities.

### **About Condyn**

Condyn is the leader in the provision of Information Security solutions for Africa and have been providing world class solutions for more than a decade within Africa, both in the public and private sector. Condyn has a team of dedicated and knowledgeable Key Account Managers that is supported by a competent and experienced technical team to assist you with all your Information Security Risk and Compliance requirements. For more information call 012-665 4356 or visit us at <http://www.condyn.net>

### **About FCS and Cryoserver**

Forensic and Compliance Systems (FCS), is a privately-held company headquartered in Dublin, Ireland, with offices in London, Florida and New York and Colorado. The Cryoserver product line is a scalable, forensic email compliance archive that enables organizations automatically and securely to collect, store and index all email communication – via a convenient, tamper-evident appliance. This enables eDiscovery and forensic analysis of an organization’s entire email history that is ready for court

submission if necessary. The entire range of solutions is available from a network of channel partners. For details please visit [www.Cryoserver.com](http://www.Cryoserver.com) or call 720-746-0408.
